

Revised Federal Specification

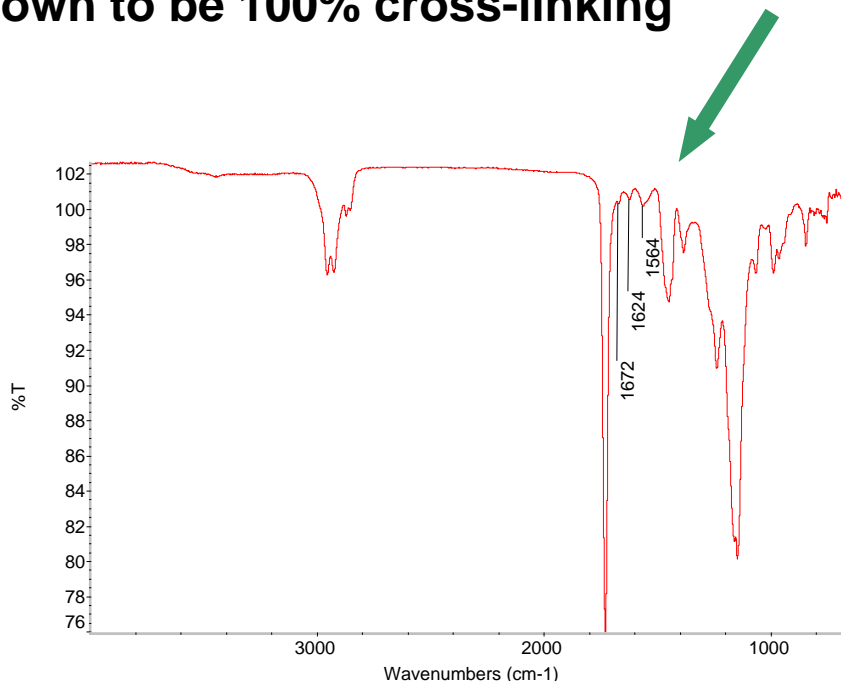

Federal Specification TT-P-1952E issued
July 10, 2007 to replace TT-P-1952D

The new Specification contains

Type III material – For increased durability

Fastrack HD-21A matches the material requirements for this Type III material, specifically:

“100% cross-linking acrylic as evidenced by infrared peaks at wavenumbers 1568, 1624, and 1672 cm-1 with intensities equal to those produced by an acrylic resin known to be 100% cross-linking”

FASTRACK™ HD-21A
