Rhoplex™ VSR-2015 Versatile Sheen Resin

Rhoplex™ VSR-2015 versatile sheen resin is a 100% acrylic binder designed for interior and exterior flat to semi-gloss coatings. Rhoplex VSR-2015 binder is solvent-free capable, contains no APEO (alkyl phenol ethoxylate) surfactants, and is low in ammonia odor. It does not require a coalescing solvent to pass a Low Temperature Film Formation test (40° F/40% RH) and provides some freeze-thaw resistance when formulated with at 50 g/L VOC with glycol in our high-quality, semi-gloss starting-point formulation.

TYPICAL PHYSICAL PROPERTIES

These properties are typical but do not constitute specifications

Appearance	Milky white liquid
Solids Content, %	49.5
pH	7.3-8.3
Tg, °C	<5
Minimum Film Formation Temperature, Visual, °C	0
Bulking Value, gals./lb.	
Dry	0.106
Weight, wet, lbs./Gal	8.84
Recommended Coalescent Level, %	0

Features and benefits of paints formulated with **Rhoplex™ VSR-2015 resin:**

- 0 VOC capable
- Excellent flow, leveling, and application properties
- Excellent scrub resistance
- Good stain resistance and washability
- Good block resistance
- Gloss alkyd adhesion
- Interior/exterior durability – tint retention, multi-substrate capable, chalk resistance, etc.
- Excellent alkali and efflorescence resistance
- Low in ammonia odor
