

# Green Spray Type Cleaner

# 环保喷式 清洁剂

## RONACLEAN™ EVP-210S

In the recently years, new vertical in line and horizontal plate equipments are highly used to replace tradition gate plate equipment in IC- Substrate and HDI PCB manufacturing field. A latest cleaner technology is developed by DowEM accordingly for a green and spray type cleaner with various performance features

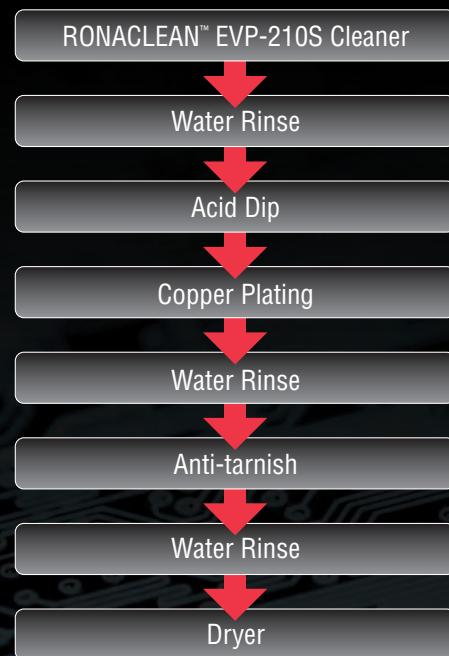

最近几年以来，新型的垂直连续电镀设备与水平电镀设备，被广泛的使用在IC封装载板与HDI印刷电路板製造的领域，并取代了传统的垂直龙门式电镀设备。陶氏化学电子材料，发展出最新一代的环保可喷式清洁剂，可被使用于垂直连续电镀设备与水平电镀设备上，并具备一些优越的特性。

### Advantage of Process

#### 优越的工艺特性

- Environmental friendly : NP/NPE free, low COD  
环保型清洁剂；不含壬基苯酚类成分，低化学需氧量
- Good cleaner power  
良好板面清洁力
- Low surface tension  
低表面张力
- Dryfilm Compatibility  
与乾膜搭配性良好
- Via filling plating process compatibility  
可搭配电镀填孔製程
- No Foaming with spray application  
于喷洒应用下，无泡沫产生

### Process 製程

Electronic Materials
