

Worldwide Worldwide Capabilities

***Delivering high-quality materials
and leading-edge R&D***

High-volume Manufacturing

- State-of-the-art vessels and processes
- Ultra high-purity environments
- Large capacity DCS-controlled production
- Automated filling and packaging

World-class Quality

- Full suite of analytical tools
- Automated SEM defect review
- CD and cross-section SEMs
- ISO 9001 and RC 14001 certified facilities

Leading-edge Technology Centers

- World-class R&D and applications teams
- 300 mm ArF Immersion lithography/defect cluster
- In-line CD-SEM capabilities
