

Duraposit™ SMT-88

Electroless Nickel

New Generation ENIG Technology

Electroposit™ PC Cleaner

Preposit™ Etch 748

Ronamarse™ SMT Catalyst CF Palladium

Duraposit™ SMT-88 Electroless Nickel

Auroelectroless™ SMT Immersion Gold

Benefits

- Proven in volume production in every region
- Designed for black pad free production
- Stable performance over nickel bath (5 MTO)
- Designed for improved corrosion resistance
- Designed for resistance to skip plating

Improved Nickel Formulation

No "black pad" corrosion

Improved Yields

No skip plating

Long Shelf Life & Excellent Reliability

Nitric Acid exposure – before

Nitric Acid exposure – (1 hour) after
