

Laminar™ E8000 Series

Dry Film Photoresist

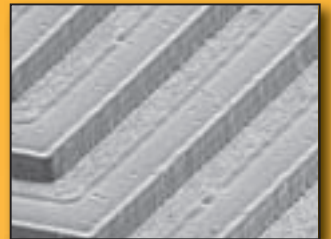

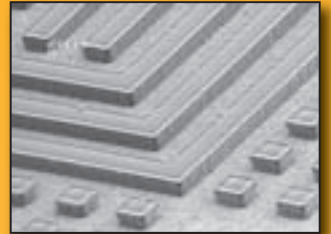

Multi-functional Alkali Etch

Description

A multi-functional photoresist that delivers excellent yield for both print-and-etch and tent-and-etch applications.

Benefits

- High resolution with excellent fine line capability
- Fast clean processing
- Excellent adhesion on small resist features
- Enhanced flexibility providing robust tenting and performance

Laminar™ E9012

Dry Film Photoresist

Innerlayer Acid Etch

Description

A high speed photoresist that provides excellent conformance, fast processing and high resolution.

Benefits

- Superior conformance to all laminate conditions
- High resolution capable of better than 1:1
- Fast photo speed, developing and clean processing
- Enhanced flexibility providing robust performance
